

David Manuel

Software Developer

davidmanuel5658@gmail.com | (832) 263-0157 | Houston, TX, 77061 | david-manuel-ab5666334

PROFESSIONAL SUMMARY

Software Developer with 10+ years of end-to-end software engineering experience designing, coding, and maintaining enterprise applications across Healthcare, Consulting, and SaaS environments. Expertise in building highly scalable web applications and distributed systems using Python, Java, and JavaScript (React/Node.js). Proven track record of translating complex enterprise and user requirements into functional, robust digital solutions while optimizing API response times, data storage layers, and cloud infrastructure on AWS and Google Cloud Platform.

CORE COMPETENCIES

Primary Languages & Frameworks: Python (FastAPI, Django), Java (Spring Boot), JavaScript / TypeScript (Node.js, Express, React, Angular)

API Design & Microservices: RESTful APIs, GraphQL, gRPC, WebSockets, Microservices Architecture, Swagger / OpenAPI

Database & Data Engineering: PostgreSQL, MySQL, SQL Server, MongoDB, Redis, Elasticsearch, Vector Databases

Cloud & DevOps: AWS (EKS, ECS, Lambda, API Gateway), GCP, Docker, Kubernetes, CI/CD (GitHub Actions, Azure DevOps, Terraform)

Security & Compliance: OAuth2, JWT, Enterprise SSO, RBAC, HIPAA Alignment, OWASP Top 10, Data Encryption

PROFESSIONAL EXPERIENCE

Software Developer

Dec 2022 – Present | Rochester, NY

Netsmartz

- Architectural lead designing, coding, and maintaining high-throughput backend microservices and web solutions using Python (FastAPI), Java (Spring Boot), and JavaScript (Node.js/React) for an Enterprise AI Copilot Platform.
- Translated complex client and user requirements into secure, functional digital solutions, reducing median API response times from 850ms to 380ms (45% improvement) through Redis caching, query tuning, and async operations.
- Architected end-to-end data pipelines across PostgreSQL, MongoDB, Redis, and Elasticsearch to power real-time analytics and transaction workflows.
- Enforced robust application security using OAuth2, JWT, Enterprise SSO, and RBAC to protect multi-tenant enterprise assets.
- Automated build, test, and containerized deployment workflows using Docker, Kubernetes, Terraform, and AWS cloud infrastructure.

Senior Full Stack Software Engineer

Feb 2020 – Nov 2022 | Chicago, IL

Tempus AI

- Designed and built secure RESTful and GraphQL APIs utilizing Python and full-stack web technologies to support healthcare analytics, clinical workflows, and third-party enterprise integrations.

- Cut p95 backend API latency from 620ms to 470ms (24% performance gain) by refactoring legacy code, implementing asynchronous processing, and optimizing database indexing.
- Implemented HIPAA-aligned security protocols, field-level encryption, audit logging, and RBAC to safeguard sensitive medical and healthcare datasets.
- Collaborated with product owners and UX designers to convert complex business logic into high-performing administrative web dashboards and reporting modules.
- Managed containerized application deployments across AWS and Google Cloud Platform utilizing Docker and Kubernetes.

Software Engineer

Dec 2015 – Jan 2020

Talmate

- Developed core software applications and microservices using Java (Spring Boot) and JavaScript (Node.js) for an enterprise workflow automation and IoT management platform.
- Accelerated workflow execution speeds from 12 minutes to under 6 minutes (50% reduction) through targeted database optimization, Redis caching layers, and code refactoring.
- Built secure end-to-end authentication mechanisms adhering to OAuth2, JWT, and OWASP security standards.
- Implemented continuous integration and delivery (CI/CD) pipelines leveraging Docker, Kubernetes, GitHub Actions, and Azure DevOps to ensure high operational efficiency and system availability.

EDUCATION

Bachelor's Degree in Computer Science

Aug 2011 – May 2015 | Houston, TX

University of Houston
